Preliminary Project Schedule
MV-22 - Main A, Reinjection & CO2 Injection
[ECT#1593]
Date: August 1, 2025

Dates	Wk1	Wk2	Wk3	Wk4	Wk5	Wk6	Wk7	Wk8	Wk9	Wk10	Wk11	Wk12	Wk13	Wk14	Wk15	Wk16	Wk17	Wk18	Wk19	Wk20	Wk21	Wk22	Wk23	Wk24	Wk25	Wk26	Wk27	Wk28	Wk29	Wk30	Wk31	Wk32	Wk33	Wk34	Wk35
Task Name																																			
Project Initiation																																			
PO Receipt																																			
Customer Technical Data Receipt																																			
KickOff Meeting																																			
Project Documentation																																			
Control System Diagram																																			
I/O List																																			
Modbus List																																			
Control System Description																																			
Panel Design																																			
Update Modec Panel Layout Drawings																																			
Update Modec Panel Wiring Drawings																																			
Architecture Drawing																																			
Design Review Meeting																																			
Customer Approval Cycle																																			
Revisions due to Customer Feedback																																			
HMI Development																																			
HMI Design																																			
HMI Screen Shots																																			
Project Calculations																																			
Valve Sizing Calculations																																			
Flow Element Sizing & Transmitter Calibrations																																			
Controller Calculations																																			
Testing																																			
TurboPAC Test Procedure																																			
FAT Procedure																																			
Software FAT																																			
Hardware FAT																																			
Punch List Clearance																																			
Hardware Delivery (MODEC)
